ſhow ſſtages
collective

ShowStages is a video and design collective. We build narratives through projected media and interactive audio-visual experiences. We work in theatre and new media.

ShowStages consists of Erin Gruber, Joel Adria, & Elijah Lindenberger. Visit showstages.com to see past projects, listen to our community podcast, and connect with us on social media.

Below is a cheat sheet of tools we used today.

Product	Price	What is it?	OS
Millumin (www.millumin.com)	599 euro	Brand new tool for creating and performing audiovisual shows.	Windows Mac
Isadora (troikatronix.com)	$350USD	Established, general-purpose video performance software.	Windows Mac
AirBeam (appologics.com/airbeam)	$4.99	App for streaming live video from iPhone/iPad cameras directly into video software. Syphon-powered.	Mac iOS
Syphon (syphon.v002.info)	Free	Method of sharing live video between programs on a computer. Built-in to many apps, Mac-only.	Mac
NI Mate (www.ni-mate.com)	157 euro or less	Tool that allows your Xbox Kinect connect to your computer for human movement points and depth images.	Windows Mac
XBox Kinect Sensor (www.xbox.com/en-CA/Kinect)	$150 ($100 used)	Infrared camera that can determine depth and detect human movement. Use with many different tools.	Windows Mac
Quartz Composer (www.iloveqc.org/learning)	Free	Powerful patching software for creating real time visualizations. Developer tool free from Apple.	Mac

Educational pricing and trials are available for most software.
